

Alex Doe

Software & AI Engineer

📍 San Francisco, CA | ✉ alex.doe@example.com | ☎ +1 (555) 019-2834 | 🌐 alexdoe | 🐙 alexdoe | 🏠 alexdoe.dev

Profile

Software & AI Engineer with experience in production software engineering and deploying scalable AI services. Interested in machine learning platforms, backend architectures, and production-grade intelligent systems.

Education

State University, Master of Science in Computer Science	2024 – 2026
Tech Institute, Bachelor of Science in Software Engineering (GPA: 3.9/4.0)	2020 – 2024

Experience

Machine Learning Engineer - Tech Innovations Inc. (Jan 2025 – Present) – San Francisco, CA

- Designed and deployed production-ready **inference endpoints**, processing high-volume daily requests with sub-100ms latency.
- Architected **agent workflows** and tool ecosystems with persistent memory and structured model-interaction workflows.
- Built **scalable data pipelines** for large-scale datasets, reducing processing runtime by 50% through automated validations.

Software Engineer - Cloud Solutions Corp. (Mar 2023 – Dec 2024) – New York, NY

- Optimized backend service workflows and reduced API latency by 60% across containerized microservices.
- Automated testing and dataset validation pipelines via Python scripts, eliminating manual QA overhead.
- Developed and maintained backend services integrating external APIs and PostgreSQL databases applying clean architecture.

Projects

🔗 **OpenSearch Engine** — Open Source Project (2024)

- Developed an open-source semantic search engine applying **transformer-based embeddings** and vector indexing.
- Implemented a clean full-stack architecture using Next.js (TypeScript) for frontend and FastAPI (Python) for backend.

Skills

Programming Languages: Python • TypeScript • C/C++ • Go
Frameworks & Libraries: FastAPI • React • Next.js • Pandas • NumPy • PyTorch • TensorFlow
Databases: SQL (PostgreSQL, SQLite) • NoSQL (Redis, MongoDB)
Infrastructure & Systems: Linux • Git • GitHub Actions • Testing • CI/CD • Docker
Cloud: AWS (EC2, S3) • GCP (Compute Engine, Cloud Storage)
Artificial Intelligence: LLM Systems • Vector Embeddings • RAG • Computer Vision • Model Evaluation & Reproducibility
Languages: English (Native) • Spanish (B2) • French (B1)
